<https://a-harry.github.io/MyPortfolio/> 

A flexible team-player seeking a position as a software developer. Offering fundamental knowledge of computer science concepts such as object-oriented design and data structures.

Skills

- Knowledge of Java, C#, Python
- Experience with SQL Developer and MongoDB Database management applications
- MEAN Stack (MongoDB, Express, Angular, Node)
- Excellent interpersonal and organizational skills
- Mobile App Development
- Web Application Development
- MERN Stack (MongoDB, Express, React, Node)

Education

SEPTEMBER 2016 - APRIL 2019

Advanced Diploma / George Brown College, Toronto, ON

Graduated from George Brown as a Computer Programmer Analyst with honors for the Fall 2018 / Winter 2019 Terms

Projects:

- **Capstone:** Worked with a team to design a web application using MEAN stack for companies to track and modify inventory. Responsible for updating customer credit and displaying credit history on profile page.
- **Video-Store App:** Developed a MEAN stack web application to allow store admins to update and add movies available in store for customers to reserve.
- **Live Chat App:** An application developed with the MERN stack to give users the ability to interact with each other in real time.
- **Bank application:** Created a simple bank application with Java that fulfills the task of depositing and withdrawing money from an account using core object-oriented concepts.
- **Android Conference App:** Designed an app that allows users to create their schedule and update their list of guest speakers and attendees.
- **Need-a-Hand:** Helped design a user-friendly job posting application in PHP coding.
